

What special features do you notice about the plants around you?

Hint: Look carefully at plants that catch your attention. Why are you drawn to them? Is it the colour, size, shape or smell?

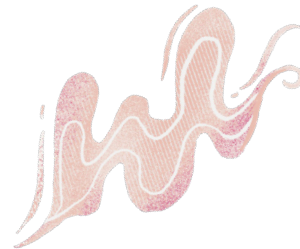

Colourful flowers

Spikes or thorns

Huge leaves

Interesting smells

Climbers

Needle-like leaves

Challenge:

These special features are called 'adaptations'. Can you match the adaptation to its purpose, for example storing water, protecting the plant from predators, absorbing lots of sunlight?

Key vocabulary:

habitat, adaptation, survive, biome, climate, protection, photosynthesis, pollination

Look carefully and record what you discover

Plant name	Habitat	Special feature
